PROFESSIONAL SUMMARY

B.Tech Computer Science student specializing in Artificial Intelligence and Data Science with hands-on experience in Power BI, SQL, Excel, Power Query, DAX, and Python. Skilled in data cleaning, transformation, data modeling, KPI analysis, dashboard development, and data visualization. Developed analytics projects across HR, supply chain, product, and database domains. Seeking an entry-level Data Analyst or Power BI Analyst role to apply analytical and business intelligence skills to real-world problems.

TECHNICAL SKILLS

Data Analytics: Data Cleaning, Data Transformation, Exploratory Data Analysis, KPI Analysis, Data Visualization, Business Insights

Power BI: Power BI Desktop, Power Query, Data Modeling, DAX, KPI Cards, Slicers, Filters, Tables, Matrix, Interactive Dashboards

SQL: MySQL, SELECT, WHERE, AND, OR, NOT, ORDER BY, DISTINCT, LIMIT, Aggregate Functions, GROUP BY

Excel: Data Cleaning, Formulas, Functions, Pivot Tables, Charts, Data Analysis

Python: Python, Pandas, NumPy, Matplotlib

Tools: MySQL Workbench, Jupyter Notebook, VS Code, Git, GitHub

PROJECTS

HR Analytics Dashboard

- Developed an interactive HR analytics dashboard using an employee dataset containing 1,481 records and 39 attributes.
- Analyzed employee attrition, demographics, job roles, departments, and workforce characteristics to identify HR trends.
- Cleaned and transformed data using Power Query and created calculated measures and KPIs using DAX.
- Designed interactive KPI cards, charts, filters, and visualizations to support workforce and attrition analysis.

Supply Chain Analytics Dashboard

- Built an interactive dashboard to analyze customer activity, orders, shipment performance, freight costs, warehouse activity, and customer satisfaction.
- Created KPIs including Total Customers, Total Orders, Total Shipment Value, Total Freight Cost, Average Satisfaction Score, and Total Shipments Processed.
- Performed data transformation using Power Query and developed analytical measures using DAX.
- Designed visualizations to identify shipment trends, logistics performance, and operational patterns.

Product Analytics Dashboard

- Developed a product analytics dashboard to evaluate product performance using sales, pricing, discounts, ratings, marketing spend, and market trends.
- Cleaned and transformed raw data using Power Query for analysis and visualization.
- Created DAX measures to analyze sales performance, product metrics, and yearly trends.
- Developed interactive reports to identify high-performing products, pricing patterns, and business opportunities.

Employee Management SQL

- Designed and implemented a relational employee management database using MySQL.
- Created database tables, inserted records, and queried structured employee data using SQL.
- Applied filtering, sorting, logical operators, DISTINCT, LIMIT, and aggregate functions to analyze employee information.
- Practiced relational database management and SQL-based business data analysis.

EDUCATION

Bachelor of Technology — Computer Science / Artificial Intelligence & Data Science

Kakinada Institute of Engineering and Technology (KIET), JNTUK, Andhra Pradesh

Expected Graduation: 2027 | CGPA: 8.27/10

TRAINING & PROGRAMS

- AI Adoption Program — KIET
- Microsoft AICW Training
- Prompt Engineering
- Microsoft Excel — Data Analysis and Spreadsheet Fundamentals
- Power BI — Power Query, Data Modeling, DAX and Dashboard Development
- SQL / MySQL — Database and Query Fundamentals
- NCC Training
